

Our precast concrete feed troughs, which can be used in conjunction with a diet feeder encourages the animal to eat the whole diet mix, this helps increasing performance and providing a cost effective way of feeding. Feeding arrangements can be made to suit your individual requirements from single sided feeding to double sided feeding.

WIDE U FEEDER

Wide U feeder trough are designed to feed livestock from both sides. Best used in wintering yards or where space may be at a minimum.

ROUND TOP L FEEDER

Round Top "L" feeder are designed for where a passage way may be narrow as it has a vertical back unlike other types of feed troughs that may lay back into the passage way it also comes in 3.3 meter lengths.

HIGH L FEEDER

High "L" shape feed trough, this is designed to suit high output mixer machine and it will also provide more room for feed storage.

ROUND TOP U FEEDER

Designed for simple cattle rations where there is a full curve at the base of the trough so the feed will always fall towards the animal and the animal will not pack the feed on the under side with the back of its head this makes it easy to clean and reduces feed contamination.

J FEEDER

J feed troughs are designed for use in new builds where you do not need to build a permanent stub wall. They can also be removed to allow for change of the layout of the shed unit.

LOW J FEEDER

Low J feed troughs are designed to suit low output diet mixer machine. They can also be removed to allow for change of the layout of the shed unit.

LOW L FEEDER

Low "L" shape feed trough, this trough is designed where there is a low output on the diet mixer machine.
