

LARGE STORAGE TANKS

General notes on our large tanks:

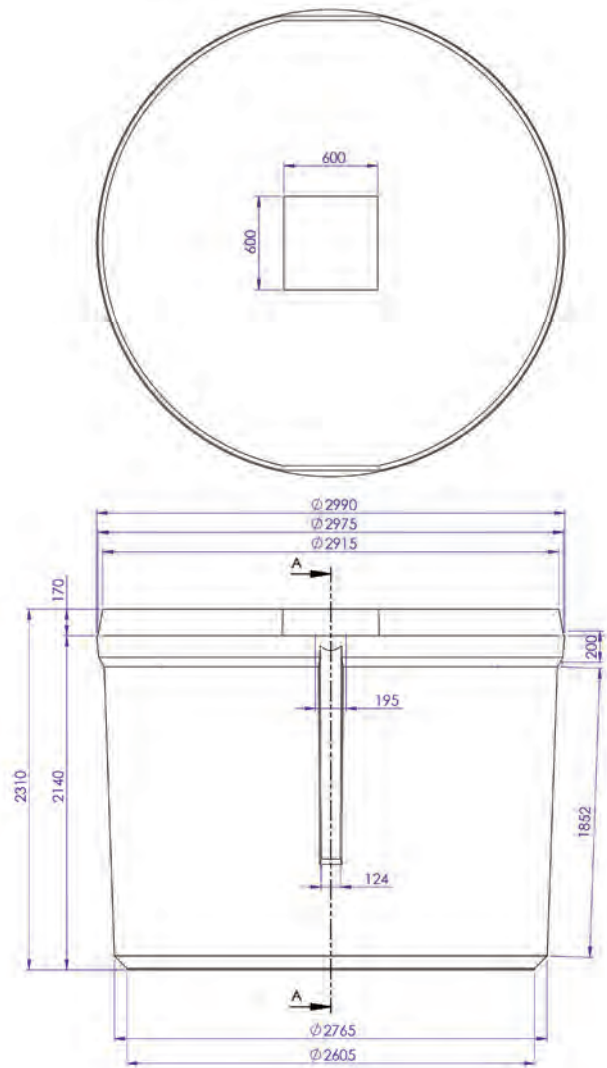

- Tanks can be provided with watertight seals for pipe entry into our precast tanks, these seals can be placed in any location in the tank to suit the customer's specification.
- The tank can be placed with a truck mounted crane provided adequate access is available.
- Concrete tanks generally can be backfilled with excavated material and there is generally no requirement for concrete backfilling, resulting in considerable cost savings.

Application and uses:

- Water reservoir
- Rain water harvesting
- Dirty water collection
- Sewage industry

11,000 LITRES

Tank Weight 5,500 kg
Lid Weight 3,000 kg
